

To find a white air mattress that fits our white summer terrace, one that can easily be stacked and handled, we looked to our friend Steven Brouns for help. He produced the first sketches for designs in coated foam. Steven created an extra value to the design by using recto-verso forms, which together made up a rectangular volume. Combined, the forms function as a settee or a bench for massages or rubbing suntan lotion onto each other. Once opened up, the forms naturally lie opposite each other. The apparently massive blocks are really lightweights, and can be easily handled by anyone. Both forms, a Z and a soft S shape, can easily be placed side by side.

design by Bart Lens.

°poolchair straight

PCH.ST

poolchair straight model

material: foam with elastic coating - weight: 13 kg - indoor and outdoor use - only sold in pairs

°poolchair curved

PCH.CU

poolchair curved model

material: foam with elastic coating - weight: 13 kg - indoor and outdoor use - only sold in pairs
