Eden Design

Handmade in Belgium

Since 2007 we combine the imagination of the designers with our research and development, allowing in only a few years to create a range of products with timeless design, distributed from Genk, Belgium to over 50 countries worldwide.

We use natural materials, selected with the greatest care. They are being processed in local workshops by professional craftsmen.

Eden Design

Bespoke

Most of the lighting products can be customized, allowing to obtain an exclusive product that is adapted to your projects. You will thus be able to create an atmosphere, accentuate objects (clothes, paintings, ...) as you wish.

Eden Design

Innovation & Quality

Artificial light is as important as sunlight, which is why Eden Design invests all its knowhow in exclusive and innovative lighting products that comply with international quality standards.

Our creatives

Bart Lens

Through his architecture and design, Bart Lens hopes to have an impact on our living environment. Bart Lens transforms things which already exist. As a part of the creative process, he observes how people experience their environment and how they occupy space. He is drawn ever closer to the materials, with the traditional ways of working them becoming ever more important. With this emphasis, Bart Lens brings sensitivity and atmosphere to a substantial part of the overall living environment.

Eden Design

Being active in the installation market for more than 35 years, Eden Design has built up a long history. Gradually turning to building automation, a significant know-how has been gathered.

When entering the path of design, this know-how has played a large role.

Creating innovative products, integrating technology and design is the main thought behind the Eden Design lighting.

Frits Jeuris

You have thinkers and you have doers. The Belgian creative artist Frits Jeuris (1975) clearly belongs to both categories. It can by no means be said that there is no thinking in Jeuris' 'head'. On the contrary, he thinks while you talk to him.

He sees concepts flying by behind his eyes and with a few strokes on a blank sheet he draws simple sketches that immediately make clear what he has in mind. At that moment, the conceptual thinker with a critical eye not only has an idea, but also immediately knows how it can possibly be realized. His knowledge of technology and materials is often based on his experience in making, or rather creating.

Frits Jeuris looks, analyses, thinks and then makes a statement with a surprisingly pure design.

Etre Moderne

Designers Philippe Vermeersch and Caroline Gielen are specialized in lighting, furniture and object design. Their style is no-nonsense, straightforward & unpretentious. At first sight simple, but sophisticated in detail. Different materials and techniques are like a red thread through the designs. They produce local (Belgium), wanting to preserve the work of craftsmen and to make their talent last.

etremoderne.be

Rubens-Frederix Architects

Strives for tactile and experimental design. At different scales, various issues such as spatial experience, materialization, relationships, etc. are questioned in interaction with the client in order to convert functional expectations into inspiring answers.

°plug

Is a minimalistic tubular light fixture that allows infinite variations. The modular light line consists of tubes that form a luminous network. The name refers to the 'jack plug', an electrical connector that provides a simple switching principle. °plug makes all conceivable connections possible in a grid with building blocks of 15 cm.

Oval & Linear

Different types of curves allow to design beautiful oval & round compositions.

With the wall brackets you can create long linear wall compositions.

Ø16mm

Plug & Play

The basis of this system is the “jack plug”. It is being repurposed to connector and sliding contact, combined with LED technology.

Every part can be plugged into another, rotated 360 degrees and modulated in an imaginary 3D grid.

Modulation is done with a simple system: every module is 15cm or a multiple of it. To merge the parts, no tools are required.

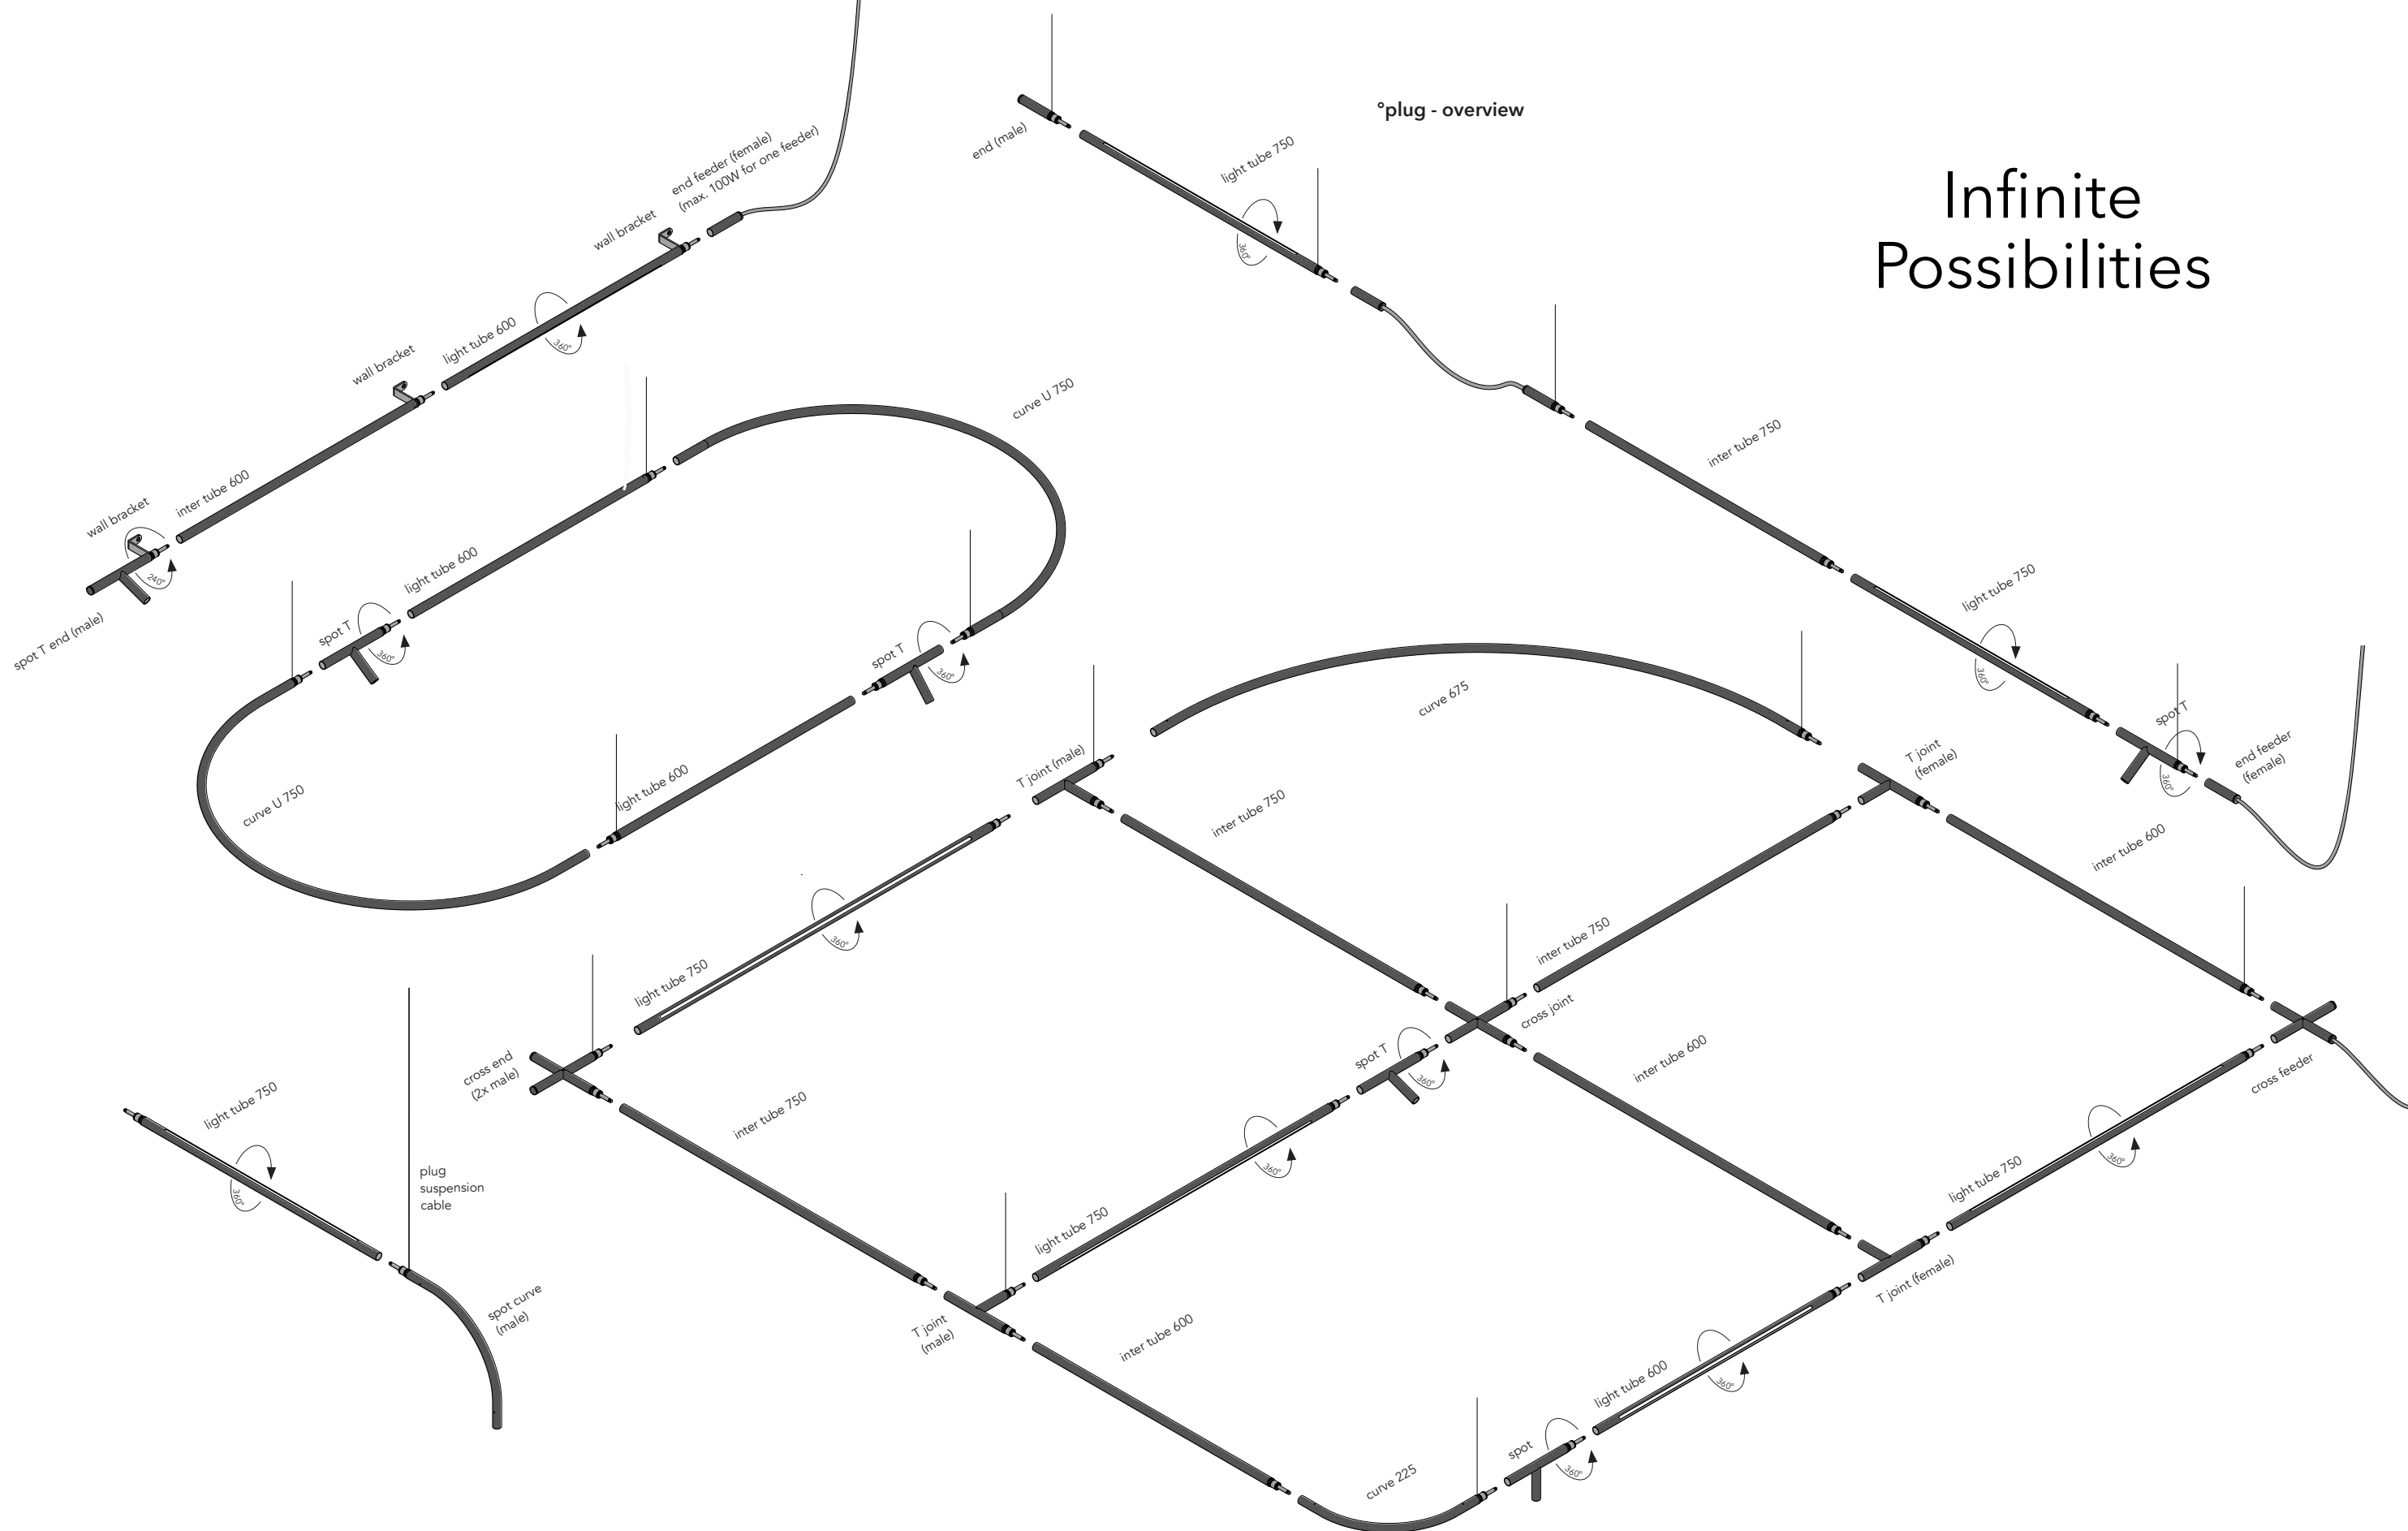

Think of a sober simple line above a table, or a busy network, running through a whole building ...

Available in brass, bronze, copper, gun metal & natural aluminium colors or black, white or custom color.

°cd+

°cd is a spot that was especially developed for cast concrete ceilings at first.

This new version °cd+ can also be recessed into other types of ceilings and shows the elegant disc.

The spots can easily be mounted in drilled holes in the ceiling. Different aluminum finishes are available to match your interior.

Finishes

°micr'online

51

The new 48V low voltage family of tracks was born out of necessity to miniaturize. Still holding the DNA of our traditional °online system but with new round edges for a soft and trendy look.

The °micr'online range offers different tracks and luminaires to obtain maximum flexibility in lighting projects. All the tracks have the same "smart core" with integrated databus for light control. Dali and Casambi for wireless control allow every luminaire to be controlled individually.

Recessed track M5

Low & compact profile.

Excellent application for concrete ceilings that are plastered. The thickness of standard plasterwork is enough to recess the M5 track.

Can also be used with plasterboard ceilings.
